

Denver's office market has experienced a sluggish start to 2023, with net absorption taking a sharp decline, and leasing activity remaining below historical averages. The region's major employers are still grappling with their plans for returning to the office, as they navigate the ongoing effects of the pandemic. However, as time passes, it is increasingly apparent that the hybrid work model has become a permanent fixture in the workplace. To entice and retain employees back into the office, companies are prioritizing the implementation of comprehensive amenity packages and upgraded workspaces.

Key Takeaways

- · Absorption returns to negative figures.
- Leasing activity remains muted, realizing 1.9 MSF in Q1 2023.
- Despite easing pandemic fears, large companies still face difficulties returning to the office. Expect a hybrid work model to become more common.
- Denver remains well-positioned looking forward due to its diversified economy, highly educated workforce, and a high quality of life.

Overall Asking Lease Rates (FSG) 2 \$30.58/SF

A Resilient City

Although Denver's economy has faced some recent challenges, such as declining demand for office space as indicated by decreased leasing activity and rental rates in Q1 2023, the city remains well-positioned for future growth. Denver benefits from a highly skilled and educated workforce, a diverse mix of tenants, low unemployment rates, and ongoing corporate relocations, all of which are promising signs for the region's economic resilience. With that said, the office market still faces significant challenges. Forecasts for a full rebound in office usage remain uncertain, making it difficult to predict when or even if such a recovery will occur.

Denver Employment Change by Sector

Since February 2020

Source: Bureau of Labor Statistics

Employment

The Bureau of Labor Statistics (BLS) reports that the Denver Metro lost 33,000 cumulative jobs from its non-farm payroll in Q1. Denver has now added 173,200 jobs since peak unemployment in April 2020.

The unemployment rate in the Denver MSA increased 0.1% to 3.4% in January, with the largest job gains in transportation and professional services. The unemployment rate in the Metro is one-fourth of its peak of 12.4% in April 2020. Given Denver's appeal to remote workers, the city is expected to continue experiencing job growth and a reduction in unemployment rates in the foreseeable future.

Absorption & Leasing Activity

The most notable statistic for Q1 2023 is that absorption plummeted to a negative figure in the Denver Metro, recording -989,404 SF. 2022 realized a total of 121,807 SF of absorption. Leasing activity in Q1 saw a similar level recording 1.9 million SF, marking the fourth consecutive quarter that has recorded less than the three-year average 2.4 million SF.

Construction

The Denver Metro has not recorded significant office delivery to start the year. The only delivery in Q1 was the pair of Medtronic buildings (353K SF).

The office construction pipeline has slowed slightly in Denver. There is currently 2.95 million SF under construction in the Denver Metro; 1,375,947 SF of which is Downtown and headlined by 1900 Lawrence (704K SF), T3 Offices (251K SF), and The Current River North (280K SF). 675,000 SF remain under construction in the Southeast consisting of Westray Tower 1 (350K SF), and The District Buildings Three (164K SF) and Four (161K SF).

Vacancy

Denver Metro's office vacancy stood at 16.6% as of Q1 2023. The Downtown market maintained the Metro's highest vacancy at 23.3%, which is 260 bps higher than the previous quarter.

Space available for sublease rose for the fourth consecutive quarter, realizing a 170,000 SF increase to 4.3 million SF. The majority of sublease space, 1.6 million SF, remains downtown, followed by 1.25 million SF in the Southeast.

Rents

Denver's office market continues to grapple with the impacts of the pandemic, with a moderate decline in average lease rates being a notable indicator. Direct average full-service lease rates in Q1 2023 remained unchanged at \$30.58/SF, compared to Q4 2022. However, this overall stability masks some significant fluctuations within the market, with downtown experiencing an increase from \$37.59/SF to \$37.70/SF, while the Southeast saw a slight decrease from \$27.03/SF to \$26.93/SF. The premium between the two submarkets remains at approximately 30%. While direct asking rates are expected to remain flat, landlords are offering increased concessions to attract tenants back to the office, resulting in plateauing effective lease rates.

Sales

The most notable sale of the quarter was Union Tower West (1801 Wewatta St.) trading to Beacon Capital Partners from Invesco Advisers, Inc. for \$54M (\$479/SF). The 113,000 SF property was built in 2017 and 100% occupied at the time of sale. 5500 Greenwood Plaza Blvd. traded to Beaver Creek Investments from Focus Property Group for \$16M (\$224/SF). This 70,000 SF property was built in 1974 and 100% occupied at the time of sale.

Denver has realized a noticeable decrease in investment interest since the increase in interest rates, and this trend is expected to continue for several months.

Forecast

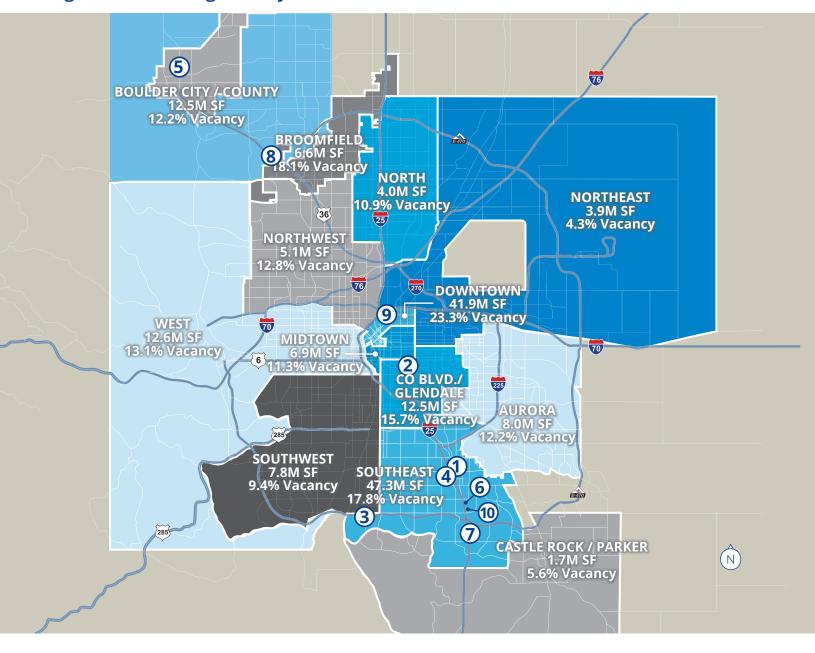

The Denver office market remains troubled, as evidenced by a decrease in both leasing activity and absorption. Although efforts to reintegrate remote workers back into the workplace continue, many large employers continue to face difficulties in doing so. This situation has resulted in increased flexibility in work arrangements, posing significant challenges for landlords attempting to secure new leases in a climate dominated by hybrid work models. These trends suggest that the Denver office market will continue to encounter significant obstacles in the years ahead.

In Q1 2023, metrics indicate that the pandemic's impact on the market will likely last through the end of the year, and even beyond. With companies still grappling with the best strategies for returning to the office, market uncertainty remains. However, Denver remains well-positioned to recover more quickly than many other major metropolitan areas, given its robust, highly-educated workforce, and diverse industries. Nevertheless, it is evident that the pandemic will continue to shape the market for some time to come.

Inflation Falls to a Rate of 6.1% in February

About Colliers

Colliers (NASDAQ, TSX: CIGI) is a leading diversified professional services and investment management company. With operations in 67 countries, our more than 15,000 enterprising professionals work collaboratively to provide expert advice to real estate occupiers, owners and investors. For more than 25 years, our experienced leadership with significant insider ownership has delivered compound annual investment returns of almost 20% for shareholders. With annualized revenues of \$3.0 billion (\$3.3 billion including affiliates) and \$40 billion of assets under management, we maximize the potential of property and accelerate the success of our clients and our people. Learn more at corporate.colliers.com, Twitter @Colliers or LinkedIn.
